- I.) Adjust the tension of the Cable by adjusting the Pulley position on the Double Floating Pulley Bracket (#31). If the cables are too loose, move up the Pulley. If the cables are too tight, move down the Pulley.
- J.) **For best performance of the machine, adjust the Cables so the Selector Stem (Top Plate) on the weight stack is 1/4" above the first plate. While pinning the weight stack, push down on the Selector Stem to close up the gap then pin the plates. This will remove the slag in the cable system so the range of motion is smooth and tight.**
- K.) Connect the Shiver Bar (#19) to a Long Chain (#48) with a C-clip (#53). Connect the Long Chain to the Lower Cable with another C-clip.
- L.) **Before doing Leg Developer and Low Pulley exercises, ensure to remove Lat Bar (#18) and Short Chain (#49) from the Upper Cable (#35) to avoid Lat Bar dropping off from Upper Frame.**
- M.) **When using Low Pulley for Arm Curl and various exercises, ensure both feet stand on Front Base Plate (#15) to avoid possible tipping of the machine.**
